

Rubio Monocoat Stain Remover Set Instructions

› **Don't know the origin of the stain?**

STEP 1. First attempt to remove the stain with the All Natural Wood Cleaner Spray. This will often be sufficient to remove your (fresh) stain.

Instructions:

1. Make the surface dust-free.
2. Spray All Natural Wood Cleaner Spray onto the surface.
3. Rub dry with the enclosed microfiber cloth.
4. Allow to dry. Rinsing with clean water is not necessary.

STEP 2. Is the treatment with the spray insufficient to (completely) remove the stain? Then you can switch to the stain removers. Use the following order for this:

- First try to remove the stain with the Limespot Remover.
- If your stain is still there, switch to the Grease Remover.
- Your last option is the Tannin Remover.

Instructions:

1. Spray the remover on the stain.
2. Let absorb for 2 to 3 minutes.
3. Dab dry with the enclosed microfibre cloth or a paper towel (do not wipe!).
4. Clean the whole surface thoroughly after. Use a damp cloth for this or clean with All Natural Wood Cleaner Spray.

› **You do know the origin of the stain?**

If you do know what type of stain you have, it is not necessary to apply the All Natural Wood Cleaner Spray first. In that case you can immediately use the correct stain remover. For the removal of stubborn stains, you may need to repeat the procedure below several times until the stains have completely disappeared.

Instructions:

1. Spray the correct remover on the stain.
2. Let absorb for 2 to 3 minutes.
3. Dab dry with the enclosed microfibre cloth or a paper towel (do not wipe!).
4. Clean the whole surface thoroughly after. Use a damp cloth for this or clean with All Natural Wood Cleaner Spray.

› **The removers are effective for the following stains:**

Limespot Remover - gets rid of lime stains and other alkaline stains such as:

- Fertilizers
- Radiator water
- White circles
- Wine stains (first try with Surface Care)

Grease Remover - gets rid of grease stains such as:

- Olive oil
- Oil for chips
- Chips
- Oil
- Shoe & heel marks
- Shoe polish
- Marker pen

Tannin Remover - gets rid of black/tannic acid stains such as:

- Urine (from pets, children, etc.)
- Rings/stains from cans, flower pots, ...
- Rust stains
- After water damage on parquet
- In case of efflorescence on outside wood (on the bottom of gates, doors, on walls, etc.)

Tips & Tricks

- Tannin Remover is also suitable for outdoor surfaces and untreated, oiled or waxed surfaces
- Works most efficiently on fresh stains
